

Combustibility Test for Materials (AS 1530.1)

Scope: The Australian National Construction Code definition of combustibility of material is that as determined by AS 1530.1. This Standard sets out a test method for a small-scale assessment of building materials, and components.

Sample size: 10 cylindrical specimens
Diameter 45+0,-2mm, Height 50±3mm,
A 2mm diameter hole axially from the top of the specimen to the geometric centre of the specimen.
The accuracy of all dimensions is essential.

Test Code: T18C
